

The 12/24 Volt compressor air conditioner for agricultural, earthmoving and special vehicles

## Work Cool - Work Smarter

Viesa WorkAir is the rooftop air conditioner specially designed for agricultural tractors, construction equipment, forklifts and unconventional vehicles. Thanks to its innovative technology, the Viesa WorkAir system provides optimal climate control inside the driver's cab, ensuring comfortable working conditions even on the hottest days. Viesa WorkAir offers superior resistance to chemicals and vibration, providing greater durability and safety for the vehicle.

### Super Resistant

Thanks to its EPP (expanded Polypropylene) shell, Viesa WorkAir is more resistant than classic ABS to vibration and chemicals and also provides excellent thermal and acoustic insulation

### Protected Motor

The Viesa WorkAir air conditioner is mounted on the roof of the vehicle, it is a single self-contained unit and does not connect to the engine unit, reserving its power and durability

### Minimum Maintenance

Viesa WorkAir requires no special maintenance, the only caution is to blow off dust from time to time depending on use
